Summary

Computer Science and Engineering graduate skilled in frontend and backend development, with expertise in PostgreSQL, React, Node.js, and DevOps tools. Experienced in building responsive, user-centric applications using frameworks like Angular and Spring Boot. Focused on delivering solutions aligned with user needs and project goals.

Education

Aalim Muhammed Salegh College of Engineering - Affiliated to Anna University 2021–2025
Bachelor of Engineering in Computer Science and Engineering CGPA: 8.14/10

Skills

- Frontend Development: HTML, CSS, JavaScript, TypeScript, Sass, React, Next.js, Angular, Redux Toolkit, Zustand, Tailwind CSS, GSAP
- Backend Development: Java, Spring Boot, Node.js, Express.js, PostgreSQL, MongoDB, Kafka, Microservices, Python, CrewAI, LangChain, Gradio
- DevOps & Tools: Git, GitHub, npm, Maven, Webpack, Module Federation, Jenkins, Docker, Kubernetes, AWS, Postman, JUnit, Linux

Certifications

DevOps: CI/CD with Jenkins, Docker, Kubernetes & AWS (Udemy) April 2025

Projects

Project Management Platform Angular, TailwindCSS, TypeScript

- Developed a responsive project management application using Angular and TailwindCSS for cross-device compatibility.
- Implemented drag-and-drop task boards with CRUD functionality and user assignment features.
- Integrated real-time chat and document management with upload, edit, and delete capabilities.
- Implemented an interactive friend management system, including search, request sending, and status tracking.
- Deployed the frontend on Firebase and the backend on Render, ensuring seamless API integration.

House Rental Management System MongoDB, Express.js, ReactJS, Node.js

- Built a house rental platform with property listing and user account management features.
- Implemented secure user authentication using JWT for signup and login processes.
- Developed RESTful APIs with Node.js and Express for efficient data handling.
- Managed property and user data storage and retrieval using MongoDB.

Video Streaming Platform Spring Boot, Microservices, Java

- Designed a scalable video streaming platform using Spring Boot and microservices architecture.
- Optimized video delivery for enhanced user experience and performance.
- Implemented service discovery to improve system scalability and reliability.
- Configured centralized management for efficient service updates and maintenance.

Chat Application ReactJS, Node.js, MongoDB, Socket.IO

- Created a real-time chat application with text and image messaging using ReactJS.
- Developed secure backend with Node.js and JWT for user authentication and messaging.
- Integrated MongoDB for user data and chat history storage.
- Enabled instant messaging and read receipts using Socket.IO for real-time updates.

Resume to Portfolio Generator Python, CrewAI, LLM (Qwen2.5), Gradio

- Developed an AI-driven tool to convert resumes into modern HTML portfolios using CrewAI and LLM agents.
- Built a PDF parser using pdfplumber to extract text and structured resume data.
- Created two CrewAI agents: a resume parser and a frontend engineer to sequentially process and generate the portfolio.
- Designed a responsive and clean portfolio layout using HTML and TailwindCSS for modern, mobile-friendly design.
- Integrated a Gradio UI to allow users to upload resumes or input data manually, and download the generated portfolio.
