Summary

Full-stack developer with hands-on experience building production-ready applications using the MERN stack (MongoDB, Express.js, React, Node.js). Strong in developing responsive, scalable solutions with a focus on performance, reliability, and user-centric design.

Education

Aalim Muhammed Salegh College of Engineering, Affiliated with Anna University, Chennai 2021 – 2025
Bachelor of Engineering in Computer Science and Engineering (B.E.CSE) **GPA: 8.13/10**

Skills

Frontend: HTML, CSS, JavaScript, TypeScript, React, Redux Toolkit, Zustand, Microfrontend

Backend & Tools: Node.js, Express.js, MongoDB, RabbitMQ, Kafka, Microservices, Git, Module Federation

Experience

VoxyHealth September 2025 – February 2026
SDE Intern

- Actively contributed to the live production environment, working across frontend and backend systems.
- Debugged production issues by analyzing application logs using Kibana, identified root causes, and implemented permanent fixes to prevent recurrence.
- Supported feature enhancements, bug fixes, UI polishing, and redesigns for live applications.
- Collaborated with engineers to deliver scalable and maintainable solutions.
- Key technical skills: React, Node.js, Python, JavaScript, Express.js, TypeScript, MongoDB, RabbitMQ, Manual Testing, and Unit Testing.

Projects

Project Management Platform *Angular, TailwindCSS, TypeScript*

- Developed a responsive project management application using Angular and TailwindCSS for cross-device compatibility.
- Implemented drag-and-drop task boards with CRUD functionality and user assignment features.
- Integrated real-time chat and document management with upload, edit, and delete capabilities.
- Implemented an interactive friend management system, including search, request sending, and status tracking.
- Deployed the frontend on Firebase and the backend on Render, ensuring seamless API integration.

House Rental Management System *MongoDB, Express.js, ReactJS, Node.js*

- Built a house rental platform with property listing and user account management features.
- Implemented secure user authentication using JWT for signup and login processes.
- Developed RESTful APIs with Node.js and Express for efficient data handling.
- Managed property and user data storage and retrieval using MongoDB.

LinkTrace *Node.js, Express.js, MongoDB, Redis, RabbitMQ, React, TypeScript*

- Built a scalable URL shortening platform with modular clean architecture and feature-based backend design.
- Integrated Redis caching and RabbitMQ-based asynchronous processing for high-performance link resolution and analytics tracking.
- Implemented secure session-based authentication with Passport.js, CSRF protection, and rate limiting.
- Developed a responsive React frontend with feature-based controls and real-time analytics visualization.

Chat Application *ReactJS, Node.js, MongoDB, Socket.IO*

- Created a real-time chat application with text and image messaging using ReactJS.
- Developed secure backend with Node.js and JWT for user authentication and messaging.
- Integrated MongoDB for user data and chat history storage.
- Enabled instant messaging and read receipts using Socket.IO for real-time updates.

Certifications

DevOps: CI/CD with Jenkins, Docker, Kubernetes & AWS (Udemy) [Certificate] April 2025
