Summary

Computer Science and Engineering graduate skilled in both frontend and backend development, with expertise in PostgreSQL, React, Java, JavaScript, and Spring Boot. Experienced in building responsive, user-centric applications with a strong focus on delivering solutions aligned with user needs and project goals.

Education

Aalim Muhammed Salegh College of Engineering, Affiliated with Anna University, Chennai
Bachelor of Engineering in Computer Science and Engineering (B.E.CSE)

2021 – 2025
GPA: 8.14/10

Projects

Project Management Platform

Angular, TailwindCSS, TypeScript

- Developed a responsive project management application using Angular and TailwindCSS for cross-device compatibility.
- Implemented drag-and-drop task boards with CRUD functionality and user assignment features.
- Integrated real-time chat and document management with upload, edit, and delete capabilities.
- Implemented an interactive friend management system, including search, request sending, and status tracking.
- Deployed the frontend on Firebase and the backend on Render, ensuring seamless API integration.

House Rental Management System

MongoDB, Express.js, ReactJS, Node.js

- Built a house rental platform with property listing and user account management features.
- Implemented secure user authentication using JWT for signup and login processes.
- Developed RESTful APIs with Node.js and Express for efficient data handling.
- Managed property and user data storage and retrieval using MongoDB.

Video Streaming Platform

Spring Boot, Microservices, Java

- Built a scalable video streaming platform with microservices and Spring Boot.
- Enabled inter-service communication via RestTemplate and load balancing using service URLs.
- Integrated Zipkin for request tracing and performance monitoring.
- Improved availability using service discovery and centralized configuration.

Chat Application

ReactJS, Node.js, MongoDB, Socket.IO

- Created a real-time chat application with text and image messaging using ReactJS.
- Developed secure backend with Node.js and JWT for user authentication and messaging.
- Integrated MongoDB for user data and chat history storage.
- Enabled instant messaging and read receipts using Socket.IO for real-time updates.

Resume to Portfolio Generator

Python, CrewAI, Qwen2.5

- Developed an AI-driven tool to convert resumes into modern HTML portfolios using CrewAI and LLM agents.
- Built a PDF parser using pdfplumber to extract text and structured resume data.
- Created two CrewAI agents: a resume parser and a frontend engineer to process and generate the portfolio.

Skills

Frontend: HTML, CSS, Tailwind CSS, GSAP, JavaScript, TypeScript, Sass, React, Angular, Redux Toolkit, Zustand

Backend: Java, Spring Boot, Node.js, Express.js, PostgreSQL, MongoDB, Kafka, Microservices, CrewAI, LangChain

DevOps & Tools: Git, npm, Maven, Webpack, Module Federation, Jenkins, Docker, Kubernetes, AWS, Postman, Linux

Certifications

DevOps: CI/CD with Jenkins, Docker, Kubernetes & AWS (Udemy) [Certificate]

April 2025
